

Prof. Yoram Shiftan is the Head of the Transportation and Geo-Information Department in the Faculty of Civil and Environmental Engineering at the Technion, the Israel Institute of Technology. Prof Shiftan teaches and conducts research in travel behaviour with a focus on activity-based modelling and response to policies, the complex relationships between transport, energy, the environment and land use, and transport economics.

Prof. Shiftan is the outgoing secretary/treasurer of the International Association of Travel Behavior Research (IATBR). He is the editor of Transport Policy and serves on four additional journal editorial boards. He is a member of the Transportation Research Board (TRB) Committee on Travel Behavior and Values, the co-chair of the Network on European Communications and Transport Activities Research (NECTAR) cluster on Environment and Policy, member of the World Conference Transportation Research (WCTR) scientific committee, and chair of its Transport Security Special Interest Group.
