About Indira Gandhi Institute of Development Research, Mumbai

Indira Gandhi Institute of Development Research was established in 1987 by the Reserve Bank of India to conduct cutting-edge research on issues pertaining to economics and development studies from a multidisciplinary perspective. The chairman of the IGIDR board is the Governor of Reserve Bank of India. Keeping in view its objective of making advancement in teaching and research in economics and development studies, the Institute offers doctorate degree in Development Studies and Masters in Economics. The faculty members received their doctoral degrees from top institutes across the world. They conduct policy oriented research in diverse fields such as macroeconomics, microeconomics, development economics, banking and finance, international trade and finance, political economy, environmental economics, labour economics, energy and environment, economics of education, food and agriculture, financial inclusion, industrial organisation among others. The faculty members regularly publish high quality research in reputed peer reviewed international journals.
